

ABSTRACT OF THE DISCLOSURE

An electroluminescent element with an electroluminescent material and a fluorescent substance. The fluorescent substance emits light having an emission maximum at a wavelength different from that of light emitted from the electroluminescent material upon absorption of the light emitted from the electroluminescent material. A color conversion filter is also disclosed. The color conversion filter has a fluorescent substance emitting light having an emission maximum at the wavelengths of 400 to 700 nm upon absorption of the light emitted from the electroluminescent material.
